Customer: Ohio State University Medical Center-Main Computer Operations

Location: Columbus, Ohio

About the Customer: Part of the most comprehensive health sciences campus in the United States, The Ohio State University Medical Center includes a college of medicine and public health, five hospitals, two free-standing research institutes and a network of more than 30 community-based primary and specialty care facilities throughout central Ohio. Their three-part mission of patient care, teaching and research sets them apart as the only academic medical center in the area.

The Application: The Medical Centers Central Data Processing Facility was being moved to a larger facility to accommodate the growing needs of the Medical Center and they needed an expanded Command Control Console to monitor its computer systems. The department required a Console solution that provided scalability, operator efficiency and design aesthetics.

Product: SMC System 2000

Installation Date: March 2005
